

Sustainability Summit

This CPD seminar entitles you to 1 formal CPD point. Please be aware you are required to manage your own CPD records. We will provide you with your participation certificate once you have attended the full seminar.

A COMPLETE SOLUTION: INVESTIGATING THE PRODUCT LIFE CYCLE

1. What are some recent building product supply chain issues and how can they be overcome?
2. What are the five stages of a product life cycle?
3. What are some things to consider when measuring the environmental impacts of a product throughout its entire life?
4. What should architects/designers look for in terms of the product lifecycles in their designs?

At the end of this panel, attendees will be able to:

- Define the term 'Product Life Cycle' as it relates to the construction sector and the built environment.
- Identify the environmental considerations that pertain to each stage of the Product Life Cycle.
- Outline the types of efforts that are being made by industry, at each stage of the Product Life Cycle, to minimise the environmental effects of their products.
- Outline the best ways for architects and designers to identify products that are environmentally sustainable.
