

Sustainability Summit

The below answer sheet is for your own self-assessment. Please keep your completed questionnaires and answers on file for your record.

How To Design And Establish Social And Sustainable Affordable Housing For Communities

1. What are some ways the government can increase our affordable housing stock?
2. Who are some of the stakeholders that also could contribute to alleviating our housing stress issues?
3. What are some other ideas, more long-term ideas that could be utilised to help increase our stock of new housing?
4. What are some of the types of land that can be repurposed for affordable housing?

At the end of this panel, attendees will be able to:

- Understand ways to create viable, yet aesthetic and functional, affordable housing options for communities.
- Understand how socially and environmentally responsive social models are realized.
- Understand how rising demand for material reductionism is leading developers to increasingly deliver social infrastructure as part of their portfolios.
