

The below answer sheet is for your own self-assessment. Please keep your completed questionnaires and answers on file for your record. Sustainability Summit will send you a Refuel certificate once your questionnaire has been submitted.

## Sustainable Trends In Education Design

1. What key lessons have emerged from a decade of data on the Sustainable Buildings Research Centre (SBRC), and how can these insights influence future sustainable education design?

2. What specific sustainable design features of the SBRC have proven most effective in reducing environmental impact, and how can these be replicated in other educational buildings?

3. How has the SBRC integrated sustainability into its daily operations and maintenance, and what role does ongoing data collection play in optimizing these practices?

4. What challenges were encountered during the design and construction of the SBRC, and how can these experiences guide the development of more sustainable educational infrastructure in the future?

At the end of this panel, attendees will be able to:

- Outline the history of the SBRC as a leader in the creation of ideas and solutions regarding sustainability
- Identify the latest ideas regarding sustainable development
- Explain how Australia's journey on the path to sustainable development is progressing and outline what more needs to be done to get us where we need to be
