Design for Climate Design for Change – Resilience in Practice

1. **How can vernacular architecture inform contemporary approaches to climate resilience?**
2. **How can architects design buildings to respond to increasing risks from bushfire, heat, flooding and storms?**
3. **What does it mean to embrace the benefits of nature through architectural design?**

At the end of this presentation, attendees will be able to:

- Identify successful architectural responses to environmental challenges
- Outline the potential for these approaches to be employed elsewhere in the built environment
- Explain how architecture can embrace the benefits of nature
- Explain ways architecture can be part of the solution to environmental problems

Competency Codes: PC 16, PC 31, PC 35, PC 45
