Normalising Regenerative Design in the Built Environment

1. **What is regenerative design, and how does it differ from conventional environmental sustainability?**
2. **What are the potential long-term environmental and social benefits of regenerative design?**
3. **What challenges could limit the widespread adoption of regenerative design?**

At the end of this panel, attendees will be able to:

- Define the term 'regenerative design' and explain how it differs from the notion of 'environmental sustainability'
- Outline the long-term environmental and social benefits of regenerative design
- Identify the challenges associated with the large-scale adoption of regenerative design
- Identify ways to best address these challenges

Competency Codes: PC 10, PC 31, PC 35, PC 45
