Designing for Fire Resilience in a Changing Climate

1. **How is Australia's bushfire risk changing as the climate changes?**
2. **What frameworks currently govern bushfire-resilient design in Australia?**
3. **Are existing bushfire planning and construction frameworks adequate for future climate conditions?**

At the end of this panel, attendees will be able to:

- Quantify the risk of bushfires in Australia and the degree to which it is increasing
- Outline the frameworks that currently deal with bushfire risk
- Explain the degree to which these frameworks are/are not fit for purpose
- Identify ways in which current approaches to bushfire could be altered or improved

Competency Codes: PC 3, PC 12, PC 16
