Community Engagement and the Renewable Energy Transition

1. **Where does Australia currently stand in its transition from fossil fuels to renewable energy?**
2. **What social, environmental and economic impacts can arise from the renewable energy transition?**
3. **What factors can contribute to community opposition to renewable energy projects?**

At the end of this panel, attendees will be able to:

- Explain where Australia currently stands in its transition from fossil fuels to renewable energy
- Outline the negative (social, environmental, and economic) impacts of this transition
- Identify the degree to which anti-renewable sentiment is gaining traction in Australia
- Explain the role of community engagement in the transition to renewable energy

Competency Codes: PC 3, PC 12, PC 28
