Skills, Supply Chains, and Capacity in Sustainable Construction

1. **What is the gap between sustainability policy ambitions and the construction industry's current capacity to deliver them?**
2. **How is workforce capability affecting the delivery of sustainable construction outcomes?**
3. **How do material availability and supply chain resilience affect sustainable construction?**

At the end of this panel, attendees will be able to:

- Quantify the gap that exists between environment policy ambition and the capacity of the construction industry to realise this ambition
- Outline the ways workforce capability is currently restraining sustainable outcomes
- Outline the ways material availability and supply chain resilience are restraining sustainable outcomes
- Identify ways to address and overcome these barriers to sustainability in the construction sector

Competency Codes: PC 3, PC 10, PC 35
